Welcome to L·O·T·S

A very warm welcome to all our new customers this month.

Two Important Notes this Month:

- 1) **Our Phone Number**
- 2) **Downloading the Update**

Our Phone Number

HealthSoft's phone numbers changed recently and our old numbers won't work from 1 March 2011. Please note our new numbers:

Ph. (09) 300-7007; Fax (09) 373-4333

These are at the top of the main Dispensary screen.

Downloading the Update

Please note that for the March update and beyond, we will no longer send update disks. There are several ways to download your monthly update:

1. Auto Updates - from the LOTS Start Menu go to Tools, Options, Switchboard tab. On the bottom right tick 'Auto Download Monthly Update'. Two days before the end of the month the update will download to the computer (in the background) and the update will run in the early hours of the first of the month.
2. From the LOTS Start Menu go to Tools, LOTS Update, Download Monthly Update.
3. On the night before the end of the month you can do the debtors rollover, forecast and download the update. From the LOTS Start Menu select Monthly Update on the top menu, then 'Run Rollover & Forecast, Download & Run Update – Immediately'.

The downloaded version of the update is more up to date than the CD eg. if Pharmac notifies us of late changes then these can often be included in the downloaded update, when it is too late for the CD.

If, however, you have had trouble downloading the update in the past or don't have broadband on LOTS and would still prefer to receive your update by CD, please fax us on 09 373-4333.

New to L·O·T·S this Month

Brand Switch Fee (BSF) – Feb 2011 Changes

Please note that Arrow Enalapril is no longer eligible for BSF payment.

Medicines still eligible for BSF payments are:

Apo-Clopidogrel	1 Feb - 30 Apr 2011 (New)
Arrow Terazosin	1 Jan – 31 Mar 2011
Dapa Tabs	1 Jan – 31 Mar 2011
Imuprine	1 Jan – 31 Mar 2011
Univent	1 Jan – 31 Mar 2011

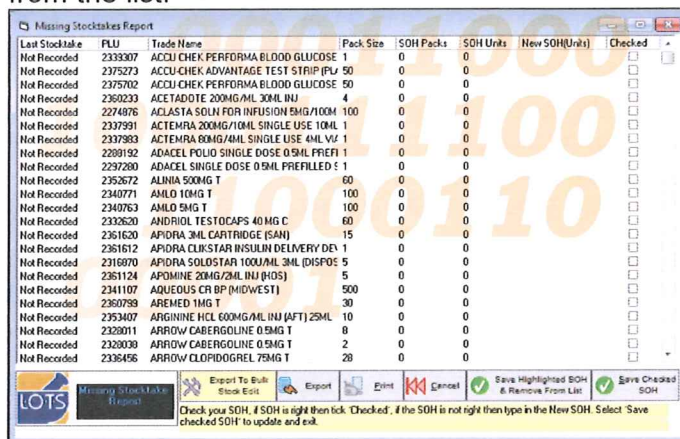

Staff & Sales Report

The option "Stock/Staff" has been added. This allows you to generate a report showing sales of a particular product by staff member. This can be used for Staff Incentives.

Missing Stocktake Report

The format of this has changed. Bring up the list, then check your SOH. If the SOH is correct, tick the 'Checked' box; if the SOH needs changing type in the new SOH and 'enter' (this will automatically tick the 'Checked' box). To update the changes and exit, select 'Save Checked SOH'.

Another way to save your changes is to select 'Save Highlighted SOH & Remove From List'. This will save the SOH of the highlighted items (even if the 'Checked' box is not ticked), and these items will be marked as 'checked' and will be removed from the list.

Last Stocktake	FLU	Trade Name	Pack Size	SOH Packs	SOH Units	New SOH(Units)	Checked

Debtors

The 'Overdue Message' wraps around if longer than 95 characters.

Exempt Card Report

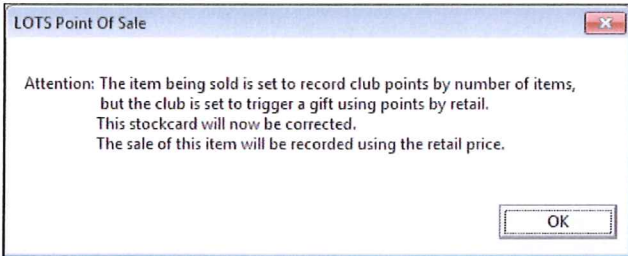

Under multi-report, this previously showed 100 patient names. It now has no limit.

Staff Utility

A staff member can be made inactive by selecting 'Deactivate Staff Member'. This will pseudo-delete the staff ID and name.

POS

If a stockcard has club points set differently from the club it belongs to, a warning prompt will come up. LOTS will automatically correct the club point setting in that stockcard.

Rollover of the Safety Net

Patient script exemptions expire at the end of January. LOTS will automatically rollover on 1 February and zero all patient script counts and exemptions.

eScripts Coming to NZ Soon

We are very pleased to have been involved in the presentations to Government on eScripts recently. We were the only pharmacy software vendor presenting.

Having had eScripts running successfully in Australian Pharmacy for about 1½ years, you will be confident in knowing LOTS eScripts will be coming to you soon. This is a Government initiative that will enable you to electronically download prescriptions from your GP.

COMING SOON – A Helpful New Look for LOTS Dispensary

There is a brand new look coming to LOTS Dispensary that will make dispensing faster, while making sure your patients get the best. A Patient History screen has been added to the Dispensary screen, making it easy to check previous script doses and medicine strengths. The feedback we've had from test sites is that it speeds up dispensing significantly as dose changes are seen immediately.

1. When in script entry, the extra panel is on the right hand side of the screen; the patient history is displayed here. This allows you to view the patient history while doing a new script without having to go back to the first patient history screen.
2. A preview label window has been added to the top of this patient history panel so you can see labels as you type.
3. On the main Patient History screen, you will see tabs for Full History, Repeats, Owings, and Phone. Click on each tab to view just those scripts in that category.

Full History Repeats Owings Held Phoned				
	Script No	Date Disp	Drug & Instructions	Owe/Held
1	1008692/0 H	30 Dec 10	30 ATENOLOL USP 100MG T (MYL) :SOLE use mdu	Held
2	1008691/1	30 Dec 10	2000ml FORTISIP BANANA (BOTTLE) use mdu	

If you would like to trial this new module, please fax us your interest.
